EDUCATION

Holy Angel University – Pampanga, Philippines

Bachelor of Science in Aeronautical Engineering

- GPA: 3.69/4.00 (converted from GWA: 1.31)
- Magna Cum Laude Graduate; consistent Dean's List and President's List honoree
- Academic Scholarship recipient, S.Y. 2024-2025
- Ranked 6th of 160 graduates (top 3.75%) in the BS AeE program

July 2022 – April 2026

Cumulative GPA: 3.69/4.0

EXPERIENCE

Quality Engineering Intern, SEAIR International, Inc.

June 2025 – August 2025

- Administered quality assurance audits and regulatory compliance checks for cargo charter aircraft in accordance with civil aviation airworthiness standards and company manuals.
- Cross-referenced technical documentation, engineering logbooks, and maintenance records against regulatory requirements to verify structural and operational integrity, reducing aircraft operational downtime by reporting defects and specific actions required.
- Tracked licenses and expiry dates of Authorized Personnel, cannibalization reports, dangerous goods monitoring, and Approved Maintenance Organization (AMO) mechanics list using Excel Spreadsheets.
- Developed PowerPoint presentations to outline Intermediate Audit results, continuously updating the 2025 Quality Audit Calendar, and verifying training compliance metrics for the Maintenance Control Manual (MCM) program.

PROJECTS

RC Plane/Fixed-Wing Unmanned Aerial Vehicle (UAV), Lead Design Engineer

January 2026 – May 2026

- Lead a team of nine engineers towards the whole aerodynamic design and structural configuration of a fixed-wing UAV.
- Produced detailed 3D CAD models and manufacturing drawings using SolidWorks to support fabrication and assembly.
- Simulated stability and control analysis using XFLR5 to validate static/dynamic stability across the intended flight envelope.
- Directed prototype assembly and structural ground testing phases; successfully verified a lightweight, high-performance airframe design that consistently outperformed peer group benchmarks in weight-to-thrust metrics.

Quadcopter Drone, Electrical Component Engineer

January 2026 – February 2026

- Collaborated with eight other members to engineer a small-scale 5-inch drone with an optimized power-to-weight ratio, using BetaFlight configuration tools to program flight dynamics and validate a notable 30-minute operational flight duration.
- Monitored and maintained the UAV project budget through rigorous BOM management, reducing unit costs while maintaining strict aerodynamic performance metrics.
- Assembled and soldered core electrical subsystems, maintaining high-quality joint integrity to ensure robust power distribution and prevent thermal or electrical failure under dynamic flight conditions.

Open Wind Tunnel and Wooden Propeller Scale Models, Lead Design Engineer

January 2025 – March 2025

- Spearheaded a team of 5 members with the goal of engineering a functional open-circuit wind tunnel for experimental aerodynamic testing, transitioning custom designs from initial SolidWorks blueprints to structural sheet metal and wooden propeller assemblies using precision manufacturing tools.

EXTRACURRICULAR ACTIVITIES

Society of Aerospace Engineers of the Philippines (SAEP)

February 2025 & 2026

Consecutive Overall Champions - Glider Making Competition

- Designed and fabricated multiple iterations of high-efficiency competition gliders, achieving top marks in flight endurance, range, and aerodynamic efficiency across two consecutive annual competitions.

Klimatech Innovative Solutions, Inc.

June 2025 - August 2025

Aerodynamics Analyst – Vortex Wind Turbine

- Assisted a start-up company in gaining aerodynamic results regarding the efficiency of the company's portable vertical axis wind turbine design through CFD using SolidWorks Simulation, establishing multiple awards and national TV appearance.

SKILLS

Design and Software: SolidWorks (CAD & Simulation), XFLR5, C++, Microsoft Office Suite

Technical Skills: Quality Assurance, Aerodynamics, Structural Analysis, Aircraft Component Design, 3D Printing, Wind Tunnel Testing, Soldering, Power Tools, Root Cause Analysis
